BH THERMO ASH

THERMALLY TREATED ASH HARDWOOD

The thermal modification process strengthens the molecular structure of the wood, resulting in greater stability. Thermo Ash has greater resistance to warping, swelling, or shrinkage despite temperature and humidity changes. Interior uses include: Flooring, bathroom features, mouldings, panelling, treads, and trims.

Thermo Ash is a harder, more decay resistant hardwood, without use of chemicals.

Outdoors, if left unfinished it will silver over time, exterior UV oil finishes can maintain colour. Exterior uses include: Decking, Patios, Siding, Porch flooring, specialty fencing, furniture, trims.
